

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) An air conditioner of an air conditioning system of a motor vehicle, comprising:

a housing, having a removable housing cover, in which the following components are arranged:

at least one blower motor,

at least one impeller,

at least one blower motor mounting, and

at least one electrical motor regulator for the blower motor,

wherein ~~characterized in that~~ the components are arranged on the housing cover (1), in particular on its inner side (13).

2. (Currently Amended) The air conditioner as claimed in claim 1, wherein ~~characterized in that~~ the blower motor mounting [(2)] comprises a decoupler ~~vibration isolator~~ (15).

3. (Currently Amended) The air conditioner as claimed in claim 1, wherein ~~characterized in that~~ the impeller (5, 5') is provided ~~assigned~~ a spiral housing (6, 6') of which a section (19, 19') is located on the housing cover [(1)].

4. (Currently Amended) The air conditioner according to claim 1, wherein ~~characterized in that~~ the section (19, 19') of the spiral housing (6, 6') is designed in one piece with the housing cover [(1)].

5. (Currently Amended) The air conditioner according to claim 1, wherein ~~characterized in that~~ the housing cover [(1)] has a receptacle [(16)] for the blower motor mounting [(2)] and/or a receptacle [(22)] for the motor regulator [(7)].

6. (Canceled)

7. (Currently Amended) The air conditioner according to claim 1, ~~wherein characterized in that~~ a blower motor ~~[[3]]~~, two impellers ~~(5, 5')~~, a blower motor mounting, ~~[[2]]~~ and a motor regulator ~~[[7]]~~ are arranged on the housing cover ~~[[1]]~~.
8. (New) The air conditioner according to claim 1, wherein the components are arranged on an inner side of the housing cover.
9. (New) An air conditioner of an air conditioning system of a motor vehicle, comprising:  
a housing, having a removable housing cover, in which the following components are arranged:
- at least one blower motor,
  - at least one impeller,
  - at least one blower motor mounting, and
  - at least one electrical motor regulator for the blower motor,
- wherein each of the components is arranged on the housing cover.
10. (New) The air conditioner as claimed in claim 9, wherein the blower motor mounting comprises a decoupler.
11. (New) The air conditioner as claimed in claim 9, wherein the impeller is provided with a spiral housing of which a section is located on the housing cover.
12. (New) The air conditioner according to claim 9, wherein the section of the spiral housing is designed in one piece with the housing cover.
13. (New) The air conditioner according to claim 9, wherein the housing cover has a receptacle for the blower motor mounting and/or a receptacle for the motor regulator.
14. (New) The air conditioner according to claim 9, wherein a blower motor, two impellers, a blower motor mounting, and a motor regulator are arranged on the housing cover.
15. (New) The air conditioner according to claim 9, wherein the components are arranged on an inner side of the housing cover.
